

Minimal contact 3D ear scans — no otoblock or disposables

With minimal patient contact, Otoscan provides full ear digital scanning while minimizing health risks for you and your patients

- No Otoblock required, minimizing the risk of cough reflex
- Designed to perform with minimal patient contact and utilizes no disposables, reducing patient contact time
- Ideal for Tele-Audiology & Mobile Audiology Models
- Electronic product scans (hearing aids, hearing protection, earmolds, replacements, etc.) easily and securely transferred from any office location to manufacturers
- Replacement orders delivered direct to client
- Create multiple products with one unique scan

The Otoscan difference

- Average scan 5mm deeper than traditional Silicone ear mold impressions
- 94% of clients introduced to Otoscan are 'wowed' by the technology

Maximum results with minimal patient contact. Discover the Otoscan difference – contact your Natus Representative today.

Healthcare solutions with one thing in mind. You.
