

# SPRINT CHART for 50-WORD LISTS

95% Confidence Limit for PBmax on NU6 50-word list. Plot score according to PTA on left ordinate and percent correct score on the abscissa. If it falls in the shaded area, it is considered disproportionately low. (Adapted from Dubno et al., 1995)

←→ 95% Critical differences for 50-word list. Plot first and second score according to the abscissa and right ordinate. If it falls within the arrow, the two scores are not significantly different. (Adapted from Thornton & Raffin, 1978)
